

Milestone 3: In-class Usability Testing

Studio Project

Milestone - In-class Usability Testing

Course Code: COSC3107|COSC3108

Weighting: 25% of your final mark for this studio group project

Task Type: Usability Testing will be conducted within your cohort with your group and another (1) group of your choice.

Due date and time (for document submission): May 24, 11:30 PM. **Needless to say, the in-person testing should happen well ahead of the document submission deadline. Each group is responsible to schedule an in-person meeting with their chosen participants (members of another (1) group)**

Marking and format: Awarded for conducting the usability testing and participation in other's usability tests during the session above. During the test, You are required to have your usability testing documents printed/ready for reading, signing, etc. by participants.

For the file submission, a 30% late penalty applies for each 24 hour block late. After 3 days late, your submission might not be accepted. If special consideration is needed, you must apply as soon as possible. If granted, special consideration affects only the group member who applied and they must meet the university's [special consideration eligibility criteria](#).  or have an [ELP](#). 

Feedback: (A) Students are expected to bring copies of their drafts to scheduled studio classes to obtain their participants' feedback.

▼ 1. Course Learning Outcomes Assessed

This assessment supports the following learning outcomes:

- CL0 1: Apply foundational programming skills to design and develop small-to-medium-scale software programs using the Python programming language;
- CL0 2: Apply core principles of user-centred design to analyse and design user interfaces with good usability that consider human needs, capabilities, usability and user experience goals.
- CL0 4: Apply SQL as a programming language, directly and embedded in Python programs, to define database schemas, update database contents and to extract data from databases for specific users' information needs;
- CL0 5: Demonstrate effective team participation, peer feedback, management and communication through relevant industry tools and practices, such as version control system;
- CL0 6: Demonstrate adherence to appropriate standards and professional practice.

▼ 2. Overview of Assessment

The studio project requires creating a **data-driven website** to address a social issue. Once you have a functioning application or a paper prototype (if the website is not yet operational), your group should perform usability testing. This testing should be based on the context scenarios and key path scenarios that your group developed earlier in the project.

In this Milestone you will:

1. Create a Participant Information Form (PIF) for participants to complete on the day of testing.
2. Create a test plan showing the tasks you want participants to test
3. Develop a Moderator Script to support your testing plan with detailed instructions on how to run the test
4. Conduct the in-class usability tests and participant in another groups usability tests
5. Develop a set of questions to collect feedback from participants after they complete the testing

▼ 3. Assessment Task

For this assessment you will participate in **in-class usability testing** where other students in the cohort will test your web application and provide feedback. Each group will be assigned a time slot to both conduct their usability tests and act as participants for another group's testing.

Each group must develop and submit the following materials:

- **Participant Information Form (PIF):** Clearly outline the purpose, procedures, confidentiality, and voluntary nature of the study.

- **Test Plan:** Develop a plan showing the tasks you want participants to test based on context scenarios and Key Path scenarios. Your tasks must cover Level 1 and Level 2 sub-tasks. Outline objectives and success criteria.
- **Moderator Script:** Develop a Moderator Script to support your testing plan. This should include detailed instructions on how to run the test, including an introduction, and a brief explanation of the tasks to be performed by the participant.
- **Survey:** Develop a set of questions to collect feedback from participants after they complete the testing. These should cover usability, satisfaction, and any suggestions for improvement. Remember that you can use a mix of quantitative tools (i.e. Likert scales) and qualitative (i.e. open-ended) questions.

Note: Participants should take no more than 10 minutes to perform tests

▼ 4. Timeline

Each member of the group should be assigned tasks. Specifically, who handles what forms and/or working functionalities of your web-app.

Ensure that all documents are submitted by the due date.

Before the deadline, students are required to schedule with their chosen participants (members of another group) to test their system and complete all the testing documents, such as the questionnaire survey and feedback form. **Needless to say, the testing should happen well ahead of the document submission deadline.**

▼ 5. Assessment submission and feedback

What will be marked: You will be marked based on the files submitted via this Canvas assignment page as well as the Usability Testing conducted during class.

Group Submission

This is a group assessment task. Therefore, only **one member** of the team needs to complete the submission on-behalf of all team members.

What to submit:

- **Participant Information Form (PIF)**
- **Test Plan**
- **Moderator Script**
- **Survey**

Both students must check that each component has been uploaded as a PDF and that all information has been recorded and submitted correctly.

▼ 6. Assessment Criteria

Please refer to the attached rubric.

▼ 7. Academic Integrity

Study Support Hub: Academic skills advisors and librarians will help you with researching your topic, finding information, improving your academic writing skills, academic integrity, effective learning strategies, statistics, and more!

Academic Integrity/plagiarism: You can achieve academic integrity by honestly submitting work that is your own. Presenting work that fails to acknowledge other people's work within yours can compromise academic integrity.

Special consideration: If unexpected circumstances beyond your control have affected your ability to complete an assessment, you may be eligible to apply for special consideration.

Ready for Life and Work

Prepare students to work in software development projects.

For more information, please consult the course guide or contact your course coordinator.

Criteria	Ratings				Pts
Participant Information Form (PIF)	3 pts Complete All sections fully detailed, including purpose, procedures, confidentiality, voluntary participation, and contact information.	2 pts Partial Completion Most sections filled, with some key details missing or not fully explained.	1 pts Missing Key Components Multiple sections missing significant information, making the form insufficiently informative.	0 pts No marks No submission	3 pts
Test Plan	3 pts Complete Clear task instructions. Objectives and success criteria defined.	2 pts Partial Completion Instructions or criteria are partially unclear or incomplete.	1 pts Missing Key Components Major elements like scenarios or instructions missing, leading to confusion in testing.	0 pts No marks No submission	3 pts
Moderator Script	3 pts Complete Clear instructions, including an introduction, the tasks to be tested and a wrap-up section.	2 pts Partial Completion Instructions are unclear or lead to confusing testing. Instructions are too prescriptive. Some sections are unclear.	1 pts Missing Key Components Script can't be followed along like a "script." Major information missing.	0 pts No marks No submission	3 pts
Conducting the tests	3 pts Complete Tests conducted smoothly and showed engagement in the role of facilitator and participant; all phases executed as planned.	2 pts Partial Completion Tests conducted with some disruptions or deviations from the plan.	1 pts Missing Key Components Tests poorly conducted, with major issues affecting the reliability of results. Lacked engagement in the	0 pts No marks No submission	3 pts
