

# Milestone 1: Ideation and Design

**COSC3107|COSC3108**

**Milestone 1: Ideation and Design**

**Course Code:** COSC3107|COSC3108

**Weighting:** This assessment is worth 25% of your final mark for the studio project.

**Length:** Report must use provided template and final report must be limited to 16 pages (including references).

**Task type:** Group of 2 students. Must not do each other's tasks; each student must complete tasks relating to their sub-task only and will be marked as such. Refer to section 3.3 of this page. Acceptability of group work depends on the group following the stated requirements.

**Due date and time:** Check this page or Canvas->Assignments for due dates that apply to you. A 30% late penalty applies for each 24-hour block late. After 3 days late, your submission might not be accepted. If special consideration is needed, use the Assessment Extension Tool on Canvas. If granted, special consideration affects only the group member who applied and they must meet the university's [special consideration eligibility criteria](#)  or have an [ELP](#) .

**Feedback:** At least four forms of feedback exist: (A) Students are expected to bring copies of their drafts to scheduled studio classes to obtain multiple on-going direction from staff during class times. (B) Additionally, attend/watch consultation sessions (announced later). (C) Students must seek written clarifications via the course discussion board -> [Milestone 1: Ideation and Design](#). (D) Final feedback will be provided via Canvas approximately 2 weeks after the close of submissions.

## ▼ 1. Course Learning Outcomes Assessed

This assessment supports the following learning outcomes:

- CL0 2: Apply core principles of user-centred design to analyse and design user interfaces with good usability that consider human needs, capabilities, usability, and user experience goals.
  - CL0 5: Demonstrate effective team participation, peer feedback, management, and communication through relevant industry tools and practices, such as version control system;
  - CL0 6: Demonstrate adherence to appropriate standards and professional practice.
- 

## ▼ 2. Overview of Assessment

The studio project involves developing a data-driven website to address a social challenge. There are several milestones to complete during the project (as shown in Canvas->[Assignments](#)).

In Milestone 1, you will have to complete the following actions **prior to** the deadline:

1. Form a group with your team partner(s) and create your team's MS Teams Channel. Note that **only** communication recorded in MS Teams will be used for assessment and other RMIT's related businesses.
2. Review the website specification document for the data-driven website to understand the tasks the website needs to support, along with the dataset that we provide to power your website.
3. Post your agreed division of tasks in your dedicated MS Teams Channel for your team and in the [Project Log document](#). Note that student contributions will be graded strictly based on this division of tasks. If your division of tasks is not separable enough among your team members, your contribution will still be graded as is.
4. Log your contributions and update your progress in the [Project Log document](#). Inaccurate logs of your contributions, such as wrong date/time completed, will result in a penalty in your final mark of the studio project.
5. Conduct secondary user research to identify important user groups who will use your website.
6. Develop personas to represent these user groups.
7. Present initial designs for the user interface for your website, using [sketches and wireframes](#) .

Must refer to section 3, Assessment Task, for details of the above.

---

## ▼ 3. Assessment Task

### 3.1 Understanding the Structure of the Studio Project

In Python Programming Studio's Canvas->Assignments->[Assessment Task 5: Studio Project](#), you and your project partner will eventually create a data-driven web-app based on a provided dataset, using the concepts covered in the user-centred design (UCD), databases (DB), and programming knowledge of the course. There are several milestones to complete for this major project, and both team members will need to complete each milestone. **Note that milestone 1 is due first**, remaining milestones ([2](#), [3](#), [4](#)) will be due at the same time. Details can be found in the [assessment module](#).

Your team's web app will have 6 unique pages. Each student will create three pages. Each page corresponds to a sub-task within a level. Each level corresponds to an increasing level of complexity. E.g. Student A will complete Sub-Task A tasks of levels 1, 2 and 3. Student B will complete Sub-Task B tasks of levels 1, 2 and 3.

Although no two pages are identical, the A and B sub-tasks are equivalent in terms of difficulty; both students are assessed on the same concepts.

### 3.2 Reviewing The Requirements of The Web-App and Data: Investigating Preventable Infectious Diseases

Both project members must thoroughly familiarise themselves with the following details that apply to the entire Studio Project. Please read the requirements specification and milestone instruction documents to get started.

- **Website requirements:** Read [the Studio Project Requirements Document](#), which details the overall functional requirements of the web-app.
- **Milestone instructions:** Read [the Milestone 1 instructions.pdf](#), which details the specific tasks that you must deliver for Milestone 1.
- **Database:** Review and understand the provided [immunisation.db](#)  (updated 10 March 2026) file, which is the SQLite database containing all the data relevant to the milestones.
- **Metadata:** [metadata file](#)  for understanding the data inside the immunisation database. Note that students are responsible for inspecting the immunisation database provided above by manually analysing each entity and their corresponding relationships. This metadata file is **only** provided out of the teaching staff's good gesture to initially guide students.

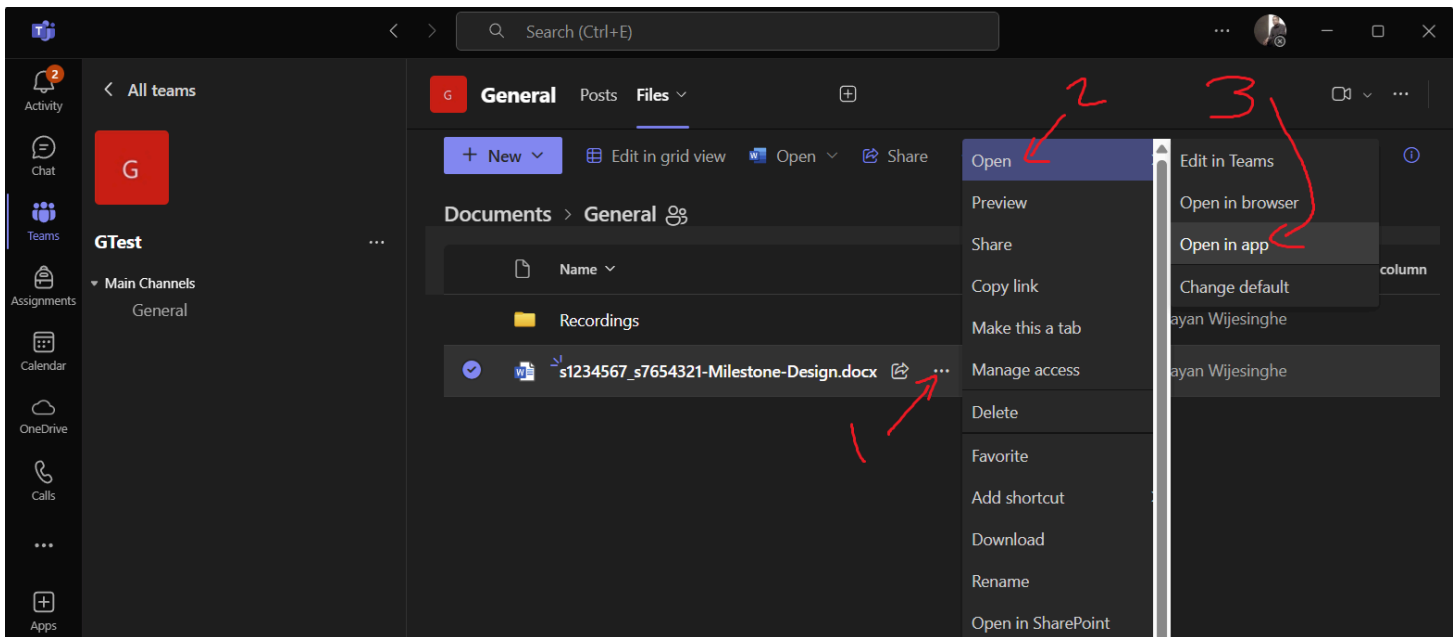

### 3.3 Your Project Group and Working Collaboratively

**Important note on access control:** It is your sole responsibility to ensure that your **project team on Microsoft Teams is private** and that only yourself and your partner are the only students there. Grant access to the lead instructor of your cohort upon creation. Over-sharing access to your Teams space with other students would have the same [academic integrity violation implications](#)  as handing your work over to someone else to submit.

### 3.4 Writing the Milestone 1 - Design report

You must create a Word document and upload it to the files section of your private Microsoft Teams. Both team members must follow the instructions there and write it collaboratively **directly on the shared document at all times (must not work on copies)**. We will assess your work based on the

track/changes and edits history of this **live** document. **Do not update the content for other team member, doing so will explicitly exclude their direct contributions to the group progress.** Even if you are the only member active in the group (for whatever reason), do not work on your own copies, as staff need to be able to periodically check your group's progress. Instead, you can open the shared document via the desktop app of Microsoft Word ([available free to RMIT students](#) ) as follows:

**Do not use any other methods to edit your file, or your submission might not be marked.**

### 3.5 Bringing Group Issues to the Attention of Staff During Classes

Whenever you feel there is an issue with the teamwork, you must add a submission comment under this assignment page and bring this to the attention of your class instructors during class times so that they can provide the best advice for your team to function correctly. Simply adding submission comments will not suffice.

### 3.6 Submitting Your Report Regularly

Refer to section **5. Assessment Submission and Feedback**, further below on this page.

### 3.7. Updating your contribution log and progress regularly.

Update your contribution and progress in the ["Project Log"](#) document. This document should be shared in the Files tab of your MS Teams Channel. Please refer to section **Teamwork skills &**

**Assessment of Teamwork** in your Milestone 1 instructions.

---

## ▼ 4. Timeline

It is expected that you will create and maintain a live document showing the timeline and distribution of tasks in your private Microsoft Team. Remember to communicate and post via your MS Teams Channel any crucial dates relating to work that need to be done together. E.g. both students should work together on the navigation aspect of their wireframes to give a consistent experience to the end-user.

There is a 3 late day policy for this assessment. **No late submission will be permitted after 3 late days.**

---

## ▼ 5. Assessment submission and feedback

For your submission to be acceptable for marking, it must follow all instructions given on this page (e.g. registration of group, team, etc.) as well as:

- Each group must submit their report as a single PDF that contains your group's report via the Assignment link in Canvas.
  - Additionally, you must submit the "[Project log](#)" document.
- 

## ▼ 6. Assessment Criteria

Please refer to the attached rubric.

---

## ▼ 7. Academic Integrity

**[Study Support Hub](#)**: Academic skills advisors and librarians will help you with researching your topic, finding information, improving your academic writing skills, academic integrity, effective learning strategies, statistics, and more!

**[Academic Integrity/plagiarism](#)**: You can achieve academic integrity by honestly submitting work that is your own. Presenting work that fails to acknowledge other people's work within yours can compromise academic integrity.

**[Special consideration](#)**: If unexpected circumstances beyond your control have affected your ability to complete an assessment, you may be eligible to apply for special consideration.

**[Use of GenAI and breach of academic integrity](#)**:  During your work, you need to demonstrate the tools and sources you used to develop your ideas. While the use of GenAI tools are not prohibited,

generating invalid data, fake information and invalid resources it is considered a breach of academic integrity. Please refer to the [Academic Integrity website](#) .

---

## Ready for Life and Work

Prepare students to work in software development projects.

For more information, please consult the course lead or contact your course coordinator.

| Criteria                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  | Ratings                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |                                                       | Pts   |
